

# WIRELESS SMS PANEL

## General Description

For many existing installation, it is expensive to install new network cables for upgrading of existing remote monitoring system. Thus, the use of Wireless SMS Panel for system upgrades, without incurring any cabling infrastructure cost, is ideal.

IP-ALARM Panel is a standalone low-cost SMS Controller with remote monitoring and control capabilities using SMS messaging. It is fully pre-assembled and ready to be installed.

## Applications

Ideal for applications for Remote site monitoring, Computer rooms, Environmental Monitoring, Sub-station monitoring, Pump room monitoring and Intrusion Alarms.

### Upgrading of Existing School With IP-ALARM Panel
